DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-14 and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pant et al. in view of Crevasse et al.

Pant discloses a method and apparatus for a linear chemical mechanical polisher comprising a wafer carrier (17), a continuous belt (12), a motor means (column 3, lines 55-60), a support platen (25), a plurality of openings in concentric circles (not numbered but shown in figure 10), a pressure detector (column 5, lines 35-38), a flow regulator (column 5, lines 56-57), a process controller (column 5, lines 50-53), and a plurality of zones (column 6, lines 51-55).

Pant does not disclose a gas source.

Art Unit: 3723

Crevasse disclose a gas source (58) in a polishing apparatus for the purpose of providing air through apertures in a platen.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Pant et al. to include the gas source as taught by Crevasse et al. for the purpose of providing air through apertures in a platen. The size of the apertures in the platen would have been obvious to one having ordinary skill in the art at the time the invention was made, since it is within the general skill of the worker in the art to select size on the basis of its suitability for the user's preference as a matter of obvious design choice.

Allowable Subject Matter

4. Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
